Backstory

She was born as a soldier meant for combat a unique breed that was a miniature swarm. She started life fighting human armies quickly becoming one of the swarms most feared. Rather than fighting her the humans teleported her to a remote planet with nothing but giant monsters. She's spent 80 years in solitude and now she's been given a chance for contact thanks to a small fluffy creature.

Personality

She tries to maintain an air of superiority but is undermined by the fact that she's amused by every new thing that she sees. Years alone has made her gone a little mad and she refers to herself as "we" wether to reference

Abilities

Swarm control

Selica herself can make silk and has poison fangs but her main ability is to control her swarm which is comprised of two types: workers and soldiers

Swarm worker

These have the ability to produce different kinds of silk like sticky to trap enemies or harden it to make weapons or repair the outer shell body. There's about a million of these acting as muscles inside the body

Swarm soldier

only a few thousand of these at a time they have poison fangs that can paralyze and can fly.

Strengths

Selica is very smart and uses her swarm in tactical ways to take down opponent much bigger than her. She has no problem lying or trying to mentally attack opponents if that will lead to her victory.

Weaknesses

She has a weird sense of pride where she'll start a fight on "equal" grounds by imitating her opponents weapons if possible. She also has a few screws loose due to being alone for so long. She has mostly lost her bloodlust and now is just amazed by new things. Even the humans she fought for so long are now more amusing. She might get easily distracted by new things.

The swarm soldier

A drone soldier abandoned in a desolate world and going crazy out of boredom.

"ALL THIS BEAUTIFUL, I MEAN, LOWER LIFEFORMS STAMP NO CHANCE AGAINST THE SWARM"

Height: 8' (shell body)
Age: 50
Race: Insectoid
Gender: She/Her

There are holes around the body from which drones can come out.

Her body is hollow, made of hardened silk and is as strong as rock.

Core: Selica's true form. She has poison fangs that can paralyze a grown human and can produce drones to replace dead ones. She's the only sentient one. Size: 1.5'

Fighter drone: It can fly and has poison fangs. There are about a thousand swarming around the shell body. Size: 1'

Worker drone: It can produce different types of silk, including sticky and one that hardens like rock. There are over a million acting as muscles inside the body. Size: 0.5'

Because her real body moves around it makes her tail appear in random places.

Her tag is a weird, egg shaped amulet she keeps somewhere inside.

She's connected to every drone and can see through their eyes.

She controls her swarm up to 100m(300ft) away, drones further than that will try to go back to the hive.

Drones can replicate themselves and increase the swarm numbers.

Feel free to maim her "body" it's just a shell and also feel free to modify it as you wish it's malleable and meant to adapt to the situation.
