

Phoenix Coast

Residential buildings that sit between the port and higher levels of Crossroads. This is the closest to "city-like" Crossroads is.

-- Unknown

One of Phoenix Coast's most alluring aspects is its contrasting natural views. To the east, the majestic mountains rise dramatically, and the main streets of Crossroads. To the west, the expansive port with its bustling docks and, shimmering waters offers a gateway to the sea, which stretches endlessly into the distance... the further you look out, the stranger the clouds look out there...

History

Phoenix Coast hosts a lively city setting within the traditional architecture of Crossroads. Residents of this area have access to more electricity than most within the land, and tend to flaunt this luxury. It may not be the most wealthy district in the area, but it *definitely* is the most modern (especially to visitors from afar). If you miss the city life, air conditioning, and neon lights, Phoenix Coast is the place for you.
