

Ume Bay

A strange bay where sun rises and sun sets last longer than anywhere else. A favored spot of couples.

-- *Unknown*

Nestled along the sandy Crossroads coastline, hidden from the typical notions of time and space, sits Ume Bay. This picturesque haven is strange, even by Crossroads' standards. A place where day and night converge in peculiar harmony. Here, the boundaries between sunrise and sunset seem to blur, offering lovers and wanderers a unique experience of endlessly extended twilight.

History

Ume Bay is a place known for its transformative pastel skies, pale pinks, soft purples, and muted blues. The sun hangs, suspended, on the edge of the horizon. The beach is dyed in its soft colors, and as the sun finally dips below the ocean, it rises again soon after in the colors of dawn. Long shadows are dragged out along the bay as this cycle plays out in suspended time.

Due to its seclusion and its blurred sense of time, Ume Bay is a favorite spot for couples to convene. Watch out that you're not interrupting anyone if you decide to take a stroll here.

Ume Bay

Twilight Lingers

Main inhabitants

None

Soundscape

[Gently lapping waves](#)

Biome

Ocean, Beach

Aesthetic

Enigmatic, enchanting, romantic

Notable Features

The extended periods of twilight that bleed into dawn
