

Emberstorm

Hiya! The name's Ember- is that a scone?! Where did you get one? A cart sellin em? I'll fix whatever you need in a minute, I need to go

-- Emberstorm

Damaya, better known as Emberstorm, is a hyperactive mechanic and cambion hero, cheerfully repairing machines and putting away criminals with the robotic companion she built, P3RLH4M, often called Perlham or Perly. She is the main mechanic of a hero agency known as Eastside Heat, a group that focuses on being "hip" and "trendy", harnessing that mid 2000's cool/edgy vibes and energy

Backstory

Born and raised up on Earth, Damaya stuck out of the group of neighborhood kids by being the only demonic one. Often getting shunned by everyone, she didn't have too many friends growing up, and due to her father having to constantly move for his job meant no one got to know her long enough until he finally quit when she was seven, and moved to Madison to be with Damaya's demonic mother and her auto shop. spending most of her days at the auto shop, she quickly got into cars and anything with an engine, shifting her school focus from culinary to mechanical with a side of programming. While in school, her father gained a new job, one that allowed his family to finally stay put. Everything would soon stop being fine once her father went to work one morning, and was killed due to gross negligence during a tornado. After her father's passing, Damaya changed her robotics' class final project for high school, modifying her caretaker bot project to be her personal robotic companion, uploading all of her recorded memories with her family into the swine-themed machine, giving birth to her iconic pal P3RLH4M. Once school was over, she wandered the town, her mind scrambled after her traumatic moment until she stumbling

Aliases/Nickname(s)

Ember
Damaya
Maya
That Girl with a Pig

Profile Data

Race

Cambion/Half-Demon

Pronouns/Gender/Sex

She/Her, Cis Female

Age

25

Weight/Height/Build

172 lbs, 6' 2", Decently Slim

B/W/H Size

Don't you wanna know, weather boy

Hair/Eye/Skin Color

Deep Purple, Amber, Red

Abilities

Pyrokinesis

Due to Damaya's demonic heritage, she is gifted with pyrokinesis, allowing her to create and control fire. She displays incredible control of her flames, able to spark walls of fire within seconds. Damaya can ignite her body as well, causing her flaming abilities to improve drastically. The excess heat and fire is used to power her mech suit if its in working condition

Demonic Strength and Endurance

Damaya's body is compactly built, muscles are condensed and appear small, giving the illusion that she's thin and weak. This is far from the truth. While she is unable to pull off amazing feats like lifting cars up by herself, or run for miles with no breaks, Damaya can still catch someone off by ripping off a car door clean off the rest of the vehicle

Portals

A unique power Damaya was born with is the ability to tear open a hole in space with a roar of flames, creating a portal, allowing her to move great distances with ease. Unfortunately she is still learning how to control it fully, leaving her stranded in the crossroads for now, and it's tied to her pyrokinesis, so if Damaya is ever hit with anything like the contents of a fire-extinguisher, she will be unable to escape easily until her powers recharge

Strengths

From her demonic heritage, Damaya is completely immune to any and all fire attacks if she doesn't decide to manipulate them, adding more fuel to her own flames. She also has increased durability from being a cambion, allowing her to take more punishment from people before giving up. Her slim body is also quite agile and flexible, helpful for getting into tight spaces while fixing intricate machinery as well as dodging flurries of attacks, though her greatest strengths lie within her mech and her mind. Despite radiating complete clueless energy, she is surprisingly smart, to the point where it catches people off guard. While within her mech, her raw physical strength is greatly improved, allowing her to really throw some heavy punches, as well as vehicles, at her opponents

Weaknesses

An unfortunate result of Damaya's hyperactive nature is that she is easily distracted by things, her attention often going elsewhere in battle if something even remotely interesting passes by. Damaya herself is like a fire, and with any fires, something sufficiently fire-retardant can stop her in her tracks. When exposed to certain fire-stopping chemicals, her powers will die down, and with constant exposure will cease to function temporarily, length of exposure needed and length of time with powers disabled varies depending on what puts out her flames, with the coolant for her mech needing only a second of contact time to switch her off, but only keeps her off for a second before she's ready to burn. The demonic origin burns strong within her, meaning any holy objects, like crosses and holy water, can cause great harm to her faster than any gun or superpower ever could. On the topic of her body, she is much less durable than her metal mech suit, leaving her as a squishy target whenever she is forced to emergency exit her suit, while the suit itself is pretty slow and clunky, forcing it to tank hits instead of dodging out of the way.

Author's Notes

Y'all can ship her with whoever, just make sure they treat her and the pig nice. she ain't one to be mean or hold a grudge, she's just a smart goober who acts dumb and is VERY chatty. if it wasn't made clear, she is INCREDIBLY protective of Perlham, and will get uncharacteristically silent and violent if any harm is directed at her swine. other than that she's quite friendly with just about everyone. If you have any questions, please ask me! i love answering things about my character, and if i don't have an answer for you, I'll make one!
